

PLATE XVIIA.

- Fig. 1. Setigerous region of a foot of *Syllis ramosa* (parent stock), . . . × 400.
- Fig. 2. Dorsal bristle, from the tenth foot of *Nereis (Platynereis) kobiensis*, . . . × 400.
- Fig. 3. Amber-coloured hook from the inferior border of the group, from the thirty-seventh foot of the same, . . . × 400.
- Fig. 4. One of the larger superior falcate bristles, from the inferior division of the foregoing foot, . . . × 400.
- Fig. 5. One of the dorsal bristles, from the tenth foot of *Nereis tongatabuensis*, . . . × 400.
- Fig. 6. Falcate bristle, from the superior lobe of the thirty-seventh foot of the foregoing, . . . × 590.
- Fig. 7. Falcate bristle, from the inferior lobe of the same foot, . . . × 590.
- Fig. 8. Dorsal bristle, from the thirty-seventh foot of *Nereis melanocephala*, . . . × 400.
- Fig. 9. Distal end of a falcate bristle, from the ventral series of the same foot, . . . × 400.
- Fig. 10. Setose dorsal bristle, from the thirty-seventh foot of *Nereis atlantica*, . . . × 400.
- Fig. 11. A falcate bristle, from the inferior division of the tenth foot of the same, . . . × 400.
- Fig. 12. Setose dorsal bristle, from the tenth foot of *Nereis longisetis*, . . . × 400.
- Fig. 13. One of the inferior ventral bristles, with very short setose tips, in the twenty-seventh foot of the foregoing, . . . × 400.
- Fig. 14. A setose bristle, from the dorsal series of *Nereis antillensis*, . . . × 400.
- Fig. 15. A falcate bristle, from the superior division of one of the posterior feet of the same, . . . × 400.
- Fig. 16. One of the upper falcate forms, from the ventral division of the foot posteriorly, . . . × 400.
- Fig. 17. Setose dorsal bristle, from the tenth foot of *Nereis kerguelensis*, . . . × 400.
- Fig. 18. One of the upper falcate bristles, from the inferior series of the tenth foot of the same, . . . × 530.
- Fig. 19. One of the falcate bristles, from the inferior division of the foot of *Nereis longisetis*, . . . × 400.
