¹ The date on the title-page of this little book is 1883, on the wrapper 1885. It was not received at Kew until the second week in March 1885, just as we were writing the last pages of this Introduction, therefore no reference to it could be made in the Report on the Botany of the Bermudas. But, from a cursory examination, we think the inhabitants who are interested in the botany of the islands will find the descriptions useful.
