

Plate.	Fig.	No. of Times Magnified.
VIII.	1. <i>Fifth Stage, continued.</i> —First Section of a series taken horizontally; this, the uppermost, shows the cavity of the cranium up to the post-clinoid region, and the fore part of the hind skull, with the medulla oblongata in section; in front, the rhinencephala are cut across over the nasal cavities,	12 diam.
„	2. Second Section.—Here, the olfactory nerves are cut across, and the sides of the great post-pituitary wall,	12 „
„	3. Third Section.—This shows the whole width of the hinder cranial region, and the roof of the nasal labyrinth is removed below the fore part of the cranial cavity,	12 „
„	4. Fourth Section.—Here the nasal cavities are fully laid open,	12 „
„	5. Fifth Section.—This section runs through the external nostrils in front, and the upper part of the ear-capsules behind,	12 „
„	6. Sixth Section.—This is so far down as to cut across the notochord in the post-clinoid wall; only the hind part is drawn,	12 „
„	6a. Part of the same,	36 „
IX.	1. Seventh Section.—This is so low down as to reach the palatal skin at one part in front, and behind to lay open the “meatus internus,”	12 „
„	1a. Part of same,	36 „
„	2. Eighth Section.—In this half-section the pterygoids and epipterygoids are reached,	12 „
„	2a. Part of same,	36 „
„	3. Ninth Section.—This section opens the lower mouth of the pituitary space, the median nasal passage, and internal nares,	12 „
„	3a. Part of same,	72 „
„	4. Tenth Section.—Here the floor of the mouth is shown, and the foramen magnum is seen at its middle part,	12 „
„	5. Eleventh Section.—This last section shows the mandibles <i>in situ</i> , and the occipital condyle enclosing the notochord,	12 „
X.	1. <i>Sixth Stage.</i> —Sectional view of skull, seen from the inside,	5½ „
„	2. Side view of skull,	5½ „
