

PLATE LXXII.

PAGE

*Farrea occa* (Bowerbank), Carter, . . .

277

(Erroneously named *Farrea haeckelii*, F. E. S., on the Plate.)

- Fig. 1. Dry skeleton of *Farrea occa*, from a photograph; natural size.
- Fig. 2. Basal portion of a small specimen, showing the aperture of an excurrent canal; natural size.
- Fig. 3. Outer terminal view of the bifurcation of a tube;  $\times 2$ .
- Fig. 4. Fragment of a specimen with very elongated (extended) tubes; natural size.
- Fig. 5. Outer view of the dermal side of the wall (combination figure);  $\times 100$ .
- Fig. 6. Uncinatum with more spines than in that figured in Pl. LXXI. fig. 4.
- Figs. 7, 8, 10. Dermal clavulæ with lemon-shaped or globular heads, varying from crowned ones with a toothed margin to smooth ones;  $\times 450$ .
- Figs. 9, 11, 12. Gastral clavulæ, anchor-like, with long teeth, or with a hemispherically arched head and much shorter teeth;  $\times 450$ .
